

July 8, 1932

Chairman, Department of Chemistry
Hamline University
St. Paul, Minnesota

Dear Sir:

A Conference of College Chemistry Teachers is being planned as one of the events to be held on our campus during Hamline's Centennial Year. The dates were set sometime since on Friday and Saturday, November 14 and 15, 1932. The possibility of a conflict of this program with the dedication of your new science building was called to our attention yesterday. This is of concern to us inasmuch as we are inviting chemistry professors and instructors associated with the liberal arts colleges in the Midwest Conference area- Illinois, Iowa, Minnesota and Wisconsin. Will you please advise me promptly concerning the date of the dedication?

You probably know that Grinnell College is planning the dedication of its new science building sometime soon. Inquiry is being made concerning the date of this occasion.

Sincerely yours,

W.L. Aldeman
General Chairman
Conference of College Chemistry Teachers
