October 6, 1952

Dr. H. P. Lewis; Dean  
The Institute of Paper Chemistry  
Appleton, Wisconsin

Dear Dr. Lewis:

The enclosure is a carbon copy of additional questions and problems abstracted from letters which came since I wrote to you on October first. More than twenty five college teachers have definitely accepted the invitation to attend. Letters are coming daily. We expect to mail the more complete programs and return cards to each college about October 25. It appears at present that at least thirty to thirty five colleges will be represented. Several colleges are sending two or more representatives.

If you have any suggestions you wish to make about the preparation of for the conference, please write to me.

Sincerely,

W.S. Haldeman
