Dr. Quentin Peterson
Department of Chemistry
Wabash College
Crawfordsville, Indiana

Dear Dr. Peterson:

At the MACTLAC meeting at Lawrence University on October 15-16 we are planning a group session on the application of NMR to organic chemistry. I wonder if you would be able and willing to serve as one of the resource persons. We envision this as a discussion in which those with knowledge and/or experience in NMR would share their knowledge with MACTLAC members who wished to learn about the technique. The session will consist of brief presentations or remarks by panel members, followed by group discussion.

We would appreciate it if you could participate in this program. If you are willing to do so, you might want to emphasize the natural product application or whatever other applications you wish. Dr. Luther Erickson, a physical chemist from Grinnell, will also be on the panel and his emphasis will probably be on the theoretical. Therefore, it would be better for the rest of us to emphasize applications.

We need you very badly on this panel and hope you can do it. Also, if you know other persons either in your department or at other MACTLAC schools who would be possible participants, please let me know. Time is getting a little late. I will inform you of the details after the panel is all set.

I shall look forward to hearing from you.

Sincerely yours,

John W. McFarland
