

Dr. H. S. Giddens

October 1, 1952

Dr. Edward S. Haenisch
Professor of Chemistry and
Head of the Department
Wabash College
Crawfordsville, Indiana

Dear Dr. Haenisch:

It was pleasant to visit with you in Atlantic City. I had to miss your talk because of the Council meeting but read about it in the C. and E. NEWS. The entire week was very interesting to me since so many acquaintances were there. There were fifteen of our Month-mouth alumni there and four of them were on the official program.

I thought you might want to see the letters we have received to date both from the Presidents and the Chemistry staff members. Will you please return these to us some time later? I have also made a brief outline of questions which cover fairly well the written matter. We are daily receiving one or more responses. Our final notice and return cards will be mailed to the chemistry staffs about October 25.

Our staff had ^a meeting with the Dean of the ^{college} and also with the Publicity head on September and discussed (a) publicity, (b) invitations, (c) entertainment, and (d) report of the conference. The enclosed copy gives some of the details to which attention must be given. If you have any other suggestions, please mail them.

The following are the exact titles given to us by the several speakers:

- "The Utilization of the Research Method in Teaching Liberal Arts College Chemistry." by Dr. Harry P. Lewis - Friday, November 14, 7:30 P.M.
- "Objective-Perspective-Plus." by ^{Dr.} Alfred E. Garrett, Saturday afternoon
- "The Scientist's ^{Bliss} in the Future" by Dr. C. E. Volwiler, Saturday evening.

Sincerely,

H. S. Giddens
