

ALMA COLLEGE

ALMA, MICHIGAN

August 6, 1962

Dr. William A. Deskin
Cornell College
Mount Vernon, Iowa

Dear Bill:

I have arranged to have Dr. Stanley Kirschner of Wayne State University give the talk on Molecular Orbital, etc., and Dr. Edward Baker of Dow Chemical Company, Midland, do the one on NMR. I am not acquainted personally with either of these men but they have been recommended by people who know their abilities. I believe this completes the personnel for the program at Alma.

The locations of some of the events may as well be on the program that goes out. These will be:

Executive Council Meeting and Luncheon--The Heather Room
(Alma Campus)

Registration--Lobby of the Dow Science Building

General Meetings--Auditorium of the Dow Science Building

Coffee Breaks--Lobby of the Dow Science Building

Banquet--Dining Room, Van Dusen Commons

Lecture by Dr. Edward Haenisch--Auditorium of the Dow
Science Building

The location of the Discussion Groups can be left until the day of the meeting.

I think now all the preliminary arrangements are in order at this end, unless there is something more you wish for me to do. Looking forward to seeing you in October, I am

Very truly yours,

Howard A. Potter *d.c.*
Dr. Howard A. Potter
Head of Chemistry Department
