

WARTBURG COLLEGE

November 17, 1952

Dr. Robert W. Gibson, President  
Monmouth College  
Monmouth, Illinois

Dear Doctor Gibson:

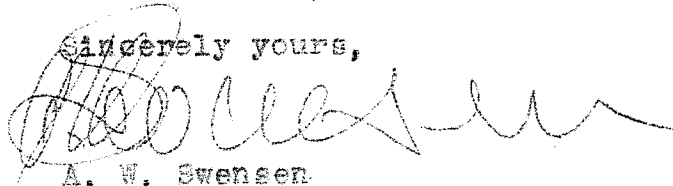

The gracious hospitality which Monmouth College manifested to the teachers of college chemistry who assembled on your campus last weekend was one of the most pleasant experiences that we have experienced for many years.

In our associations and contacts with your staff members and student body, we found without exception that every individual was an optimistic advocate of the principles for which Monmouth College stands. In every instance we found the greatest degree of courtesy and cooperation.

Rarely have we ever seen a conference which proceeded as smoothly as this one did. This was made possible only because your hard-working chemistry staff spent hours and hours in taking care of every foreseeable detail.

We know that this venture on your part will have lasting effects for the good for Monmouth College.

Sincerely yours,

A. W. Swensen
