William C. Child Jr.
Department of Chemistry
Carleton College
Northfield, Minnesota.

Dear Dr. Child:

Thank you so much for your kind words relating to the MACTIAC experiments and especially for your excellent suggestion for addition to the Heat of Combustion experiment. I am happy to say that I just received word from our editor at Van Nostrand that it is not too late to add this to the experiment prior to its going to press. I am sending this addendum to him tonight and you may be sure that there will be a foot note giving you full credit for this addition. As you say it will add immeasurably to the interest and point of this experiment.

Thank you so much for your thoughtfulness in putting this idea at the disposal of the MACTIAC manual.

Sincerely yours,

W. C. Celke
