Dr. William A. Deskin
Cornell College
Mt. Vernon, Iowa.

Dear Bill:

Thanks for the check and for the additional names. Things seem to be going well, but not enough time. We leave here June 1, but do not plan to get back to Grinnell until July 1. You may hear from me sometime after that if anything comes up.

In planning the program for next fall, it was the feeling at our earlier conference of the Editorial Board that we should not ask for full discussion time for the Laboratory Manual Project. We would like about an hour when we could gather with interested members to review progress and at which persons new to the project could learn something about it. If your planning committee could give the Project an hour at some reasonably good time of the day it would be appreciated.

We may find it advisable to have another meeting of the Editorial Board before the MACTLAC meeting. I do not know yet how this will work out.

Sincerely yours,

W.C. Oelke
