

PLACEMENT SERVICE REPORT

	83-84	84-85	85-86	86-87*	87-88	88-89
Applicants	2	5	10	6	10	6
Positions	4	27	20	5	10	11

[* First year that I was Placement Officer.]

Of the eleven position notices, 21% were Analytical, 7% were Inorganic, 14% were Physical 14% were Organic, 50 were Biochemistry, type positions. Some notices listed two areas.

Applicants were of two groups -- new Ph.D.'s (often referred to me by MACTLAC faculty advisors) and faculty members wishing to change schools.

There are many openings in MACTLAC schools which I do not have listed because I have not received a description of the position. We are not effective. C&EN and the Chronicle of Higher Education are better sources of jobs. I feel that it is time for another person to do this job.

Respectfully submitted,

Anne T. Sherren
Placement Officer

10/10/89
