

THE INSTITUTE OF PAPER CHEMISTRY
Appleton, Wisconsin

October 6, 1952

Dear Professor Haldeman:

I am now back from the west coast and will be in the office for a couple of days, in and out almost up to the time of our meeting down in Monmouth.

I am glad to know you have arranged for the room at the Hotel Custer at Galesburg. This will be very satisfactory. Whether I will need it for Saturday night I will not know for a while, but at least we have it.

I am glad to get the questions as they come and any other background material which I can use in working up the material for my own part in the program. Knowing the things the group are thinking about will help me a lot to do a better job. Apparently there is quite a lot of interest being generated in your meeting. I have had a very nice letter from the Dean at Carleton College expressing real interest in what you are going to do.

I note you would like a carbon copy of my address at the time I come to Monmouth. I should be able to get it together by then. There won't be any expenses in connection with the typing.

With best regards,

Sincerely,

Harry F. Lewis
Dean

Professor W. S. Haldeman
Monmouth College
Department of Chemistry
Monmouth, Illinois
