Mr. William C. Oelke
The Maclac Physical Chemistry Manual
1427 Tenth Avenue
Grinnell, Iowa

Dear Mr. Oelke:

Thank you for your inquiry of August 27, 1962 regarding our "recti/rite" system.

We do grant our permission to use our system in your forthcoming publication, if, as you pointed out, the proper credits, trademark, etc. are identified.

We might mention that the basic system is known as the Scott-Russell mechanism and, as you know, changes curvilinear motion to true straight line or rectilinear motion.

We are enclosing our latest "recti/riter" recorder bulletin for your files. If possible, a copy of your manual would be appreciated.

Please do not hesitate to contact us for any information you might need.

Very truly yours,

H. W. Roehrig
Requirements Engineer
