Wheaton College, Wheaton, Illinois      Friday and Saturday      October 19-20, 1956

Once again it is time to call your attention to the forthcoming meeting of MACTLAC. Given below are all the important details you will want to know about the meeting, such as program, housing and travel information. Enclosed is a copy of the program and a "I am coming" card.

MEETING LOCATION      The meeting will be held on the campus of Wheaton College, Wheaton, Illinois a suburb of Chicago.

PROGRAM      A fine program has been arranged by Prof. Frank Green, chemistry chairman at Wheaton College, and his staff members. A copy of the program has been enclosed. You will note with interest the special trip to the Argonne National Laboratories that has been arranged as part of the program.

TRANSPORTATION      The city of Wheaton is a suburb of Chicago located on the west side of Chicago. For those who drive, Highways 20, 30, 34 and 64 will bring you into or close to Wheaton. The chemistry building is located on Irving St. near Franklin Street. We have no information regarding bus or rail connections, but there doubtless are adequate connections.

GROUP DISCUSSION TOPICS      Prof. Green would like to get an idea of the topics that members would like to have for discussion at our general meeting. It is hoped that the discussion topics may be set up prior to the time of meeting so that leaders can be notified. Return this information on your reservation card.
