

November 1, 1952

Professor Edward L. Haenisch
Head of the Chemistry Department
Wabash College
Crawfordsville, Indiana

Dear Professor Haenisch:

After receiving your letter this morning the following message was forwarded to you by WESTERN UNION: FINAL PROGRAM ANNOUNCEMENTS WERE MAILED TODAY TO ALL INSTITUTIONS ON ORIGINAL LIST.

We were delayed for several days by the college printing division. The enclosed program includes the complete outline for the sessions to be held. In my letter of October 20 referred to // your suggestion of arranging the questions or topics into sub groups. As soon as you have these groups arranged, will you please send a typed copy to me so that Sawyer and I can cut the stencil or stencils and have the mimeographing done. These could be handed out to the teachers in the organization meeting. If you can mail the typed copy Friday or Saturday, November 7 or 8, we should be able to get the work done before you arrive in Monmouth.

We shall be glad to meet both of you at Galesburg, ~~Ill~~ Thursday evening, November 13, 1952 at 7.07. If you change these plans please let me know. When you buy your ticket it may be well to ask whether or not you need a seat reservation for the Denver Zephyr.

If you think of other details which may require attention, please let me know. Approximately fifty chemistry teachers have responded stating they would be here for the conference. The programs and cards which were mailed this morning should add to this number. We expect to report the number to you later in case it should increase considerably.

Sincerely yours,

W.S. Haldeman
