

LAKE FOREST COLLEGE / LAKE FOREST, ILLINOIS

DEPARTMENT OF CHEMISTRY

September 10, 1963

Dr. Wilmer J. Stratton
Department of Chemistry
Earlham College
Richmond, Indiana

Dear Wilmer:

Below is a brief statement indicating what I would like to cover in the MACTLAC discussion group. Please modify as you see fit since this may not be in the form you want.

"New Developments in the Teaching of Organic Analysis"

- (a) What is the role of organic qualitative analysis?
- (b) What instruments should be used in elementary organic?
- (c) What instruments should be used in qualitative organic?
- (d) Should organic quantitative analysis be given?
- (c) Shouldn't more experiments requiring more interpretation and judgment be given?

I intend to have available a hand-out sheet with more detailed questions at the time of the meeting. See you in October.

Sincerely,

Bill

William B. Martin
Associate Professor
of Chemistry
