

Attendance - approx 30

Non Major Course

Some goals varied but in general course designed to teach some basic principles and go into some depth on current issues and how chem applies to social & econ. issues.

Labs hindered from the fear of scientific research and math manipulations.

Some approaches include

- 1) Why we believe - what we don't see
- 2) No math, current issues & industrial chem.
- 3) Food Science & how chem applies in foods
- 4) Energy
- 5) Forensic chem
- 6) Environmental (passive)
- 7) Drug chem.

In general, course has lab and attempt to establish some rigor in course \Rightarrow make people able to converse about subject.
